2019/2020

ABOUT US

Our plant nursery farm has been established in 1991. From the very beginning our main idea and motto was to provide the customers with the best quality seedlings and plants. Thorough selection of plant varieties for our production and on-going improvements made us recognizable not only on the Polish, but also on the foreign market.

First plants that we started to reproduce were currants and strawberries. About two years later we also have added raspberry which became our main production. Along with constant growth of the company in further years we have decided to extend our range of plants. Therefore we started to work with blueberry, haskap and many other species.

We choose our plants based on many years of experience and observations which we carry out in our nursery farm. From 2012, we are also the co-founders and shareholders of NIWA Breeding Ltd, which conducts researches on new varieties of raspberry, blackberry, honeyberry (haskap), blueberry and strawberry.

One of our company branches is the sale of soft berry fruits. All details regarding the sale are discussed individually with each client. We wholeheartedly invite You to learn more about our offer and cannot wait to hear from You!

Our contact details are placed at the back of this booklet.
